## PRODUCTS OR MACHINERY

Research and service activities in the field of Modelling of Glass Forming and Tempering. Optimization of the current processes and definition of new processes based on the development of numerical and experimental tools. Computation and control of shape of glass, temperature and stress during and after the tempering. Large experience in flat and hollow glass production. Computational optimization tools, integrated analysis procedures for the optimisation of the glass forming and tempering.

### Company Profile of **Université de Valenciennes et du Hainaut Cambrésis**

A service of glasssglobal.com, an affiliate of glasssglobal group.
