Address	Friedrich Farbglasshütte GmbH KUGLER-COLORS® Reifträgerweg 29 87600 Kaufbeuren-Neugablonz
Country	Germany

PRODUCTS OR MACHINERY

Raw material for glass production , Pre-heating furnaces, Blown glassGlass for gardening uses, Antique and coloured glass, Cross out glass for melting/ Fusing glass,Glass smelting/fusion technology

Pre-heating oven

With these tunnel ovens you can produce your overlay at a reasonable price for even small series and fulfil customers wishes on a flexible basis. The tunnel ovens enable the warming up of cups and rods to the correct further processing temperature.

With oven measurements of 1,7 x 0,8 m the two "midgets" even fit into the smallest glass factories and yet you can achieve great results concerning color selection and processing speed with these ovens. The first oven is a pre-heating tunnel for colored overlay cups which can warm up heavy lead glasses and soda lime glasses with cup diameters of 60-180 mm and a variably adjustable temperature range of 450°C - 600°C. The second oven contains a pre-warming drum for rods and enables the warm up of rods up to a rod diameter of about 30 mm and a rod length of about 280 mm.
