PRODUCTS OR MACHINERY

IBG precision brushing rollers

A distinctive feature of the "full-body" bristle covering system is that every bristle is individually set in the bristle carrier, i.e. neither in tufts nor in hairpin form. This results in an absolutely uniform, stripe-free brushing pattern, as required for pile orientation in velour carpeting, for example.

The use of IBG precision brushing rollers with exchangeable tuft elements eliminates the downtime caused through fitting a new bristle carrier.

Should this type of brushing roller be required for "wet" applications, anti-corrosion protection can be assured by selecting either a galvanised or a stainless steel roller core.

Dimensions

Diameter: 60 - 500 mm
Length: 500 - 9,000 mm

Company Profile of **IBG Monforts Walzentechnik**

A service of glasssglobal.com, an affiliate of glasssglobal group.
