PRODUCTS OR MACHINERY

Chemetall's Glass division is involved in the development, manufacture and sales of chemical specialities for adding value to glass. The product range comprises: Sealants for the manufacture of high performance insulating glass units based on polysulfide and polyurethane. Laminating materials for the manufacture of laminated glass for sound reduction, safety and security. Apart from the established range of resins for sound reduction and safety applications, Chemetall offer interesting and innovative product solutions for emergency exit systems and high security applications. Resin systems for the manufacture of photo voltaic panels. Systems for modifying silicate surfaces. These products are used to create durable, easy to clean coatings on glass.
