## PRODUCTS OR MACHINERY

Training, Conferences, Meetings and Inhousetraining for experts and managers - special topics: Management, technology and renewable energies

## COMPANY BACKGROUND / HISTORY

OTTI (Ostbayerisches Technologie-Transfer Institut e.V.) was founded in 1977 as a non-profit-organisation. Our main goals are to provide state-of-the-art information and to establish networks between people from industry, science, and administration by providing conferences and workshops. Over the years we have expanded our offers, now reaching from specific technology areas like material sciences to management training.

Our energy department is one of the leading European organisers of international conferences and seminars in the field of renewable energies. The goal is to provide events where our international participants from science and industry can share their knowledge and experience, and present new technologies designed to increase the efficient use of renewable energies. We work closely together with our scientific committee representing experts from industry and research from all over the world. Our highly motivated and experienced team is always looking for new topics to provide interesting conferences on visionary topics.

The topics of our conferences comprise mini-grids, smart grids and mobility, photovoltaics, solar thermal energy, solar air-conditioning and biomass energy. Furthermore, we offer courses in the fields of building, construction and the efficient use of energy. Our conferences with the accompanying specialist exhibition in Bad Staffelstein belong to the definitive meetings of the solar energy sector in the German-speaking area.

Besides lectures and workshops OTTI offers accompanying trade exhibitions or technical tours. It is very important for us to create an atmosphere in which our participants can meet and share their knowledge and experience. Therefore, we offer long breaks and common meals to get into contact with other people.

Do you have any questions? Our team is always willing to help you. Please find all relevant contact information on [www.otti.de](http://www.otti.de). There you can also find more details about our conferences.
