PRODUCTS OR MACHINERY

Enhancing product quality and manufacturing processes

Drawing on more than 140 years' experience in material solutions for glass manufacturing, we'll work with you to enhance your products and improve your glass melting processes.

Whether you're seeking colour, clarity or chemical durability, or if you're looking to improve manufacturing efficiency and drive down costs, we can help.

Our solutions

We offer a complete portfolio of materials that includes:

dolomite

feldspar

kaolin

limestone

low-iron crystalline silica

silica flour

This is supported with a range of speciality minerals including colouring oxides, pegmatite and magnesium oxide.

In addition to these primary materials, we're at the forefront of glass recycling, each year transforming over a million tonnes of waste into high quality cullet products.
