PRODUCTS OR MACHINERY

Anvil Denarius provides real-time trade capture and execution, risk management, position tracking, P&L, internal order management, external exchange/broker order management, and reporting for a wide spectrum of asset types: fixed income, equities, F/X, money markets, and derivatives. Anvil ARTS is the world-leading system for real-time repo, securities finance and managed lending, offering the most comprehensive coverage of every aspect of this complex business, including position tracking, trading, credit and margin management, and electronic exchange interfacing. Our Anvil Consulting division provides our clients with expertise that spans both technical and business skills. We will help you with any system specification, analysis, design, implementation and deployment. Our track-record in consulting is impeccable, with many significant projects to demonstrate our unique competence. Anvil ARMS is a real-time web-based Interest Rate Risk Monitoring System. It provides you with accurate interest rate risk measurement values, including aggregation of risk across multiple trading entities. Anvil Carry gives you precise information about carry costs, allowing precise allocation of costs to originating position holders, and ensuring that trading P&L factors in the oft-ignored but all important element that is carry. Precise carry information leads directly to more informed trading and thus greater profitability. Anvil Order Management is the bridge from your trading systems to the electronic markets. Anvil Order Management links with your existing systems, or with Anvil Denarius and Anvil ARTS to give direct access to multiple electronic markets. This means you have access to maximum liquidity at best prices; you are not constrained by your systems to dealing in just one market. With Anvil Order Management you can achieve STP from trade idea to trade completion.
