Address	NOXMAT GmbH Aichelin Entwicklungszentrum GmbH Ringstrasse 7 09569 Oederan
Country	Germany

PRODUCTS OR MACHINERY

The company's production program comprises development, engineering design, manufacture, and sales of industrial gas burners, control units and furnace components, conversion and reconstruction of industrial furnaces including provision of relevant services.

Recuperated gas burners, flame and flat flame burners as well as control units for burner equipment are manufactured on a production area of 1000 m².

RHGBS SERIES "ETAMAT"

The high efficient NOXMAT recuperator burner ETAMAT sets new standards in energy savings with a combustion efficiency of up to 90%. Available in a power range from 15 to 35 kW, burners of this series achieve the highest possible heat recovery thanks to a special recuperator.

K-RHGB-RN SERIES "REMAT"

The NOXMAT retrofit recuperator burner REMAT is characterized by its easy installation in existing systems, but also by higher energy efficiency, significantly reduced wear and less expensive maintenance.

HGBE SERIES

The NOXMAT cold air burners of the HGBE series are available in a power range from 9 to 160 kW. They are suitable for cold and preheated air operation (up to 400 °C air preheating). The large flame pulse, which is immediately present when the burner is started, improves the temperature uniformity in the thermoprocessing system..

ELECTRIC HEATING ELEMENTS FOR INDUSTRIAL FURNACES

As an alternative to our proven recuperative burner systems for gas-fired industrial furnaces, we also offer a wide range of heating elements for electrically heated furnaces.

Our own project planning department supports you in the selection and dimensioning of the optimal heating variant for your production process. We are the ideal partner thanks to our many years of experience with indirect, radiant tube heating systems. Our own service team supports you with maintenance, replacement or optimization of your heating systems.

From standardized products to customer-specific solutions to highly specialized new developments: We have the right product for your requirements.
