PRODUCTS OR MACHINERY

PVflex builds flexible modules specially developed for direct glueing to the roof. The modules can be supplied for different installations mainly depending on the roofing material with or without adhesive backside layer. Depending on the construction of the pv plant these modules can be supplemented by additional accessory, for example, self-adhesive, especially light cable ducts.

To ensure that you benefit fully from our quality, we market our products exclusively via selected roofing material companies, stockists as well as qualified solar installation companies. Regular courses and advanced training ensure that you deal with qualified and professional staff who are thoroughly familiar with the new type of solar modules.

Company Profile of **PVflex Solar GmbH**
