Address	Beijing Trend Hi-Tech Insulating Materials Co., Ltd. Matou,Huoxian Town Tongzhou District Beijing 101109
Country	China (People's Republic)

PRODUCTS OR MACHINERY

Refractory Materials

Low thermal conductivity

Gives good thermal insulation, enabling the use of thin-walled constructions.

Low Heat Storage

Lower heat storage versus dense brick means reduced fuel costs in cycli-cally operated heating equipment.

High Insulating Value

The light weight and high insulating value of TREND IFB make possible thinner furnace walls, improved efficiency and lower operating costs.

High Purity

The very low iron and alkali flux content confers good refractoriness and the high alumina content contributes to their stability in reducing atmosphere.

Accurate Dimensions

Because TREND Insulating Fire Brick are machined to precise dimensions courses can be laid quickly and easily. The result is a stronger refractory lining resulting in less heat loss through the joints.

Company Profile of **Beijing Trend Hi-Tech Insulating Materials Co., Ltd.**
