Address	Stefani snc Via 2 Novembre 3 33025 Muina di Ovaro (UD)
Country	Italy

PRODUCTS OR MACHINERY

Stefani claims its range of butyl extruders is precise, easy to use, reliable and capable of high production rates. The Italian company, which has been operating in the field for over ten years, says that its K Top range, which includes the models K 700 Top and K 250 Top, is used for large and medium-sized production of double layer insulating glass. The machines are particularly efficient at applying butyl on corners, and at evenly distributing the product on two sides of the profile.
