PRODUCTS OR MACHINERY

Velvet

Velvet is a satinated glass sheet on Element float basis. It's a decorative glass for interior design, made translucent by the particular processing performed on one of its surfaces. Velvet combines a wide light transmission with the elegance of its velvety appearance. Velvet finds its natural placement in internal house design, partition walls, shower boxes, doors, pieces of furniture and in general in interior design applications.

Handling and Working

Chamfering, drilling, grinding: possible.

Lacquering, enamelling, silvering: ideal to this kind of processing. It's recommended, nevertheless, to wear the non treated side.

Binding, silk screening, tempering: possible on both sides.

Assembling with glues: ideal for glues which catalyze if they're shown to U.V. rays.

Lamination: possible. Ideal for laminating both with PVB and EVA. It is necessary in any case to lay the satin side outside.

Assembling of double glazed glass: Velvet can be assembled into double glazed glass both as internal and external sheet. In any case it's advisable to take care of the integrity of the product, positioning the satin side in position 2 or 3.
