We are please to present our latest technology"Anti-reflective coating for solar glass" as a way making more power for solar energy. Our AR technology can reduce reflect losses and increase the transmission of low iron glass to approx 95-96%. We can do AR coating on flat our patterned glass surface.

glass transmission after coating:
95%(400-1100nm)
96%(500-800nm)

We success in lowing down cost through our wet coating technology. We hope our AR coating is helpful for your solar glass.
