Address	Solico Fibre Glass Factory (L.L.C.)
	Jebel Ali Industrial Area,
	Dubai
Country	United Arab Emirates UAE

PRODUCTS OR MACHINERY

Hand Lay U

This method lends itself to small quantities, complex shapes, very big dimension products. It is the most traditional form of glass reinforced plastic (GRP) production and most textures, finishes and colors can be attained.

Resin Transfer Molding RTM

This method is ideal to get smooth surfaces on both sides, even wall thickness of the product, it is used mainly for medium and large sized products..

Cold Press Molding

Cold press is ideal for large and fast production runs of products with high mechanical properties. The product can have a maximum size of 3.3 x 2.2 meters with relatively simple shapes.

Hot Press Molding (SMC, GMT

Hot press tends to be ideal for very large and fast production runs above 10,000 items or where the product is required to have very smooth surfaces and/or precise tolerances.

High Pressure Poly-Urethane

Foam Injection

Various products with different characteristics are manufactured such as: Flexible foam products (seats)

Rigid foam products (insulation)

Structural foam products (RIM, water skis)

Polyurethane products have therefore a broad application field.

Vacuum Thermo Forming

This forming process under heat is suitable for various types of plastic products such as bathtubs, panels, claddings, covers, skylights and signboards.
