## PRODUCTS OR MACHINERY

Our Products are vital to the manufacturing of thousands of items people use every day. Each year more and more businesses turn to us to fulfill their curing, processing and manufacturing requirements. By listening to and working with our customers, we have taken an ultraviolet curing process originally developed for the graphics arts industry and adapted it for an impressive variety of uses. If your business involves curing industrial inks, coatings, or adhesives on paper, metal, plastic, glass, wood or any other material - let us help you do it more consistently, reliably, and cost effectively.
