PRODUCTS OR MACHINERY

ACCESSORIES FOR GLASS INDUSTRY

BORON NITRIDE SPRAYS

EKamold® boron nitride sprays from ESK are effective release agents and/or lubricants. They are ready to use, easy to apply and thus economical in use.

CRUCIBLES

Crucibles of ESK's MYCROSINT® boron nitride ceramic are the preferred materials for analysis of almost all molten metals. That is because they are not wetted, and their low chemical reactivity almost entirely eliminates contamination of the material under analysis.

Company Profile of **ESK Ceramics GmbH & Co. KG**

A service of glasssglobal.com, an affiliate of glasssglobal group.
