PRODUCTS OR MACHINERY

The RIDA armored glass factory is able to produce any bullet proof glass component, such as windshields and driver's side windows, for different models of armored vehicles up to the highest certified levels of protection.

This transparent armor can be made with integral heating; which allows usage of the vehicle in extreme weather conditions (rain, frost, ice and snow) with a temperature range from -40 C to +60 C.

RIDA bullet proof glass meets European Standard EN 1063 (B3, B4, B5, B6+), which has been certified by a verification and certification office for weapons and security engineering in Ulm, Germany. The RIDA bullet proof glass level B6 protects against Kalashnikov and sniper rifles with armor-piercing bullets.

Company Profile of **RIDA Group GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
