PRODUCTS OR MACHINERY

For glass container plant engineers, DuPont™ Vespel® Glass Handling Technology represents an excellent choice for hot glass handling components. DuPont™ Vespel® increases plant reliability and lowers operation costs by delivering extended life and less glass checking compared with conventional glass handling technology. The unique properties of DuPont™ Vespel® glass handling components exhibit lower thermal conductivity and oil absorption, and higher impact and wear resistance than conventional carbon graphite parts. The proprietary material science of DuPont coupled with expert technical support and service represent a comprehensive solution for hot glass handling applications.

Company Profile of **DuPont de Nemours International S.A.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
