PRODUCTS OR MACHINERY

Toyo Glass has been manufacturing high-quality glass containers that bring out the superior performances of the material, and has supplied Japanese market as well as overseas customers for over 100 years.

Initiatives for SDG's

Ecology Bottle

A glass bottles in which cullet (recycled glass) accounts for over 90% of its raw materials is called an "Ecology Bottle".

Over the years, the construction of cullet recycling infrastructure and the improvement of cullet processing technology have made it possible to produce "Ecology Bottles" using high-quality cullet.

Lightweighting Bottle

Our high bottle manufacturing technology has made it possible to reduce the weight while maintaining the required strength of glass bottles. The weight reduction of glass bottles contributes to the reduction of CO2 emissions in the production and transportation processes.

Glass Colours - Flint glass, Brown glass, Other color glass

High value-added bottle

Printing(ACL)

ACL is the oldest type of decoration for glass containers, which prints directly on the glass surface.

Ready-made Bottle and Jar

High-quality stock bottles and jars are available to every customer without the cost of manufacturing new mold equipment.

You will be able to select our ready-made bottle and jar from about 250 items.

Note) If it is out of stock, it will be manufactured after receiving an order.

Private-mold Bottle and Jar

We would like to develop and provide you with the most suitable glass container for your product.

Universal Design

Our lineup of universal design glass containers are being developed to be safe and user-friendly for everyone.

Returnable Bottle

Returnable glass bottles are used as an eco-friendly package in a wide category of products.

Resin Coating(TMC)

Our self-developed coating TMC is a resin coating for glass containers with excellent expressiveness, functionality, environment-friendliness, and safety.
