PRODUCTS OR MACHINERY

The machining of glass is mainly characterized by a variety of methods and materials. Glastechnik Kirste KG offers these specialized, high-quality products and services. Emerging from the manufacturing of glass cylinders for various applications, our spectrum of goods is now much more diverse. Therefore the different applications for customers at Glastechnik Kirste KG always take center stage.

The focal points of services are primarily in

- Production of calibrated glass tubes
- Special Machining
- External machining of round glasses
- Implementation of high-quality glass-grinding
- Production of technical polish on outer contours
- CNC machining of glass
- Processing of flat glass
- and the production of specialty products.

In these areas, the company has established itself in the market as a recognized service provider.
