PRODUCTS OR MACHINERY

CRUSE scanners are undoubtedly superior to the photography of large size originals, thanks to their image capture with a linear CCD in strictly controlled light conditions and with consistent sharpness and reproduction angle.

Every CRUSE scanner is individually constructed in Germany according to the requirements of each customer and is therefore, built exclusively to our customers' requirements. This defines CRUSE quality as the international benchmark for the scanning and reproduction of large size originals – with about 400 CRUSE scanners installed in more than 33 countries worldwide.
