PRODUCTS OR MACHINERY

Spare and wearing parts

Timing belts are a very multifaceted conveying and drive element. Due to the form-fitting and thus synchronous power transmission, timing belts are used to power machines as well as to transport products and goods. They ensure precisely timed work and optimise the technical processes of a great variety of applications through their high performance.

ATLATOS® timing belts are manufactured in our plant in Lauenburg in an ultramodern facility. Five production lines running in parallel guarantee great product diversity on the one hand, and on the other hand extremely short change-over times and hence short delivery times.

Company Profile of **Bode Belting GmbH**
