OptiLoad glass storage and handling system

OptiLoad is a glass storage and handling system that enables you to manage more raw glass SKUs in less space more efficiently and safely. With OptiLoad, you increase yields and decrease labor costs, all without adding cutting stations.

With OptiLoad, your raw glass process layout combines a Dense Storage Shuttle System and/or a Turntable Access System with our Free Fall Loader. However your OptiLoad system is configured, it brings the entire pack of glass to the cutter so cycle time is never wasted.
