## PRODUCTS OR MACHINERY

### Embossing cylinders

The dire necessity of DIRECT LASER for both printing and packaging is a spread word globally. Image Gravures takes utmost proud in being the first Indian company in utilization of this new technique of direct laser engraving in its embossing cylinders.

We are equipped with Twin Head Laser for engraving on Mild Steel, Copper, Brass, Aluminium, Ceramic, Ebonite and other material for different industrial applications.

#### Technology

- Direct Laser Engraving
- CNC 3D Engraving

#### Features

- Meticulously engraved
- Wear resistant
- Variable 2-D and 3-D embossing engraving
- Laser sharp line works

#### Applications

- Male / female embossing rollers
- Rollers for cork tip & UV Ductile printing
- Embossing rollers for Figured Glass

## COMPANY BACKGROUND / HISTORY

Image Gravures was initially started as a rotogravure printing cylinder manufacturer with 2 engraving machines in 2010. Striving for growth and expansion, the company added a new line almost every year since its operations commencement. In 2016, Image Gravures became the first company in India to invest in a commercial direct laser engraver and start a dedicated division of Embossing Cylinders. Since then, there has been an addition of 2 more laser engraving machines that have the capacity to engrave cylinders up to 3500 mm in length and 600 mm in diameter. This has helped carved a niche in the embossing cylinder segment in India, otherwise dominated by European and Chinese suppliers.

With a primary focus on the figured and solar glass industry, Image Gravures is proud to be the only supplier of such cylinders in India. Our legacy distinguishes us from our competitors as one that has extensive experience of the macro and the finer nuances of the cylinder manufacturing industry in India
