## Products or Machinery

---

### Benteler Mechanical Engineering - Glass Processing Machinery

"Glass processing is our Passion" - Our slogan says a lot about how we understand our work. With a passion built around 50 years of manufacturing glass processing equipment, Benteler Glass Processing is one of the leaders in the glass fabrication and processing industry.

We offer a full range of equipment for architectural glass manufacturer, automotive glass manufacturer, solar and display glass manufacturer – from stand-alone machines to large-batch production needs.

Benteler Glass Processing develops innovative concepts for glass processing, from fully automated lines to stand-alone equipment applications. Our range of products includes our standardized, economical tecLine washers and drilling machines, and customized machinery for all applications, including solar. With an extensive process know-how and experience, Benteler can provide flexible solutions with specialized, module-installation products, but is also a competent partner for turn-key projects. Our strengths include the comprehensive resolution of complex processes and large tasks.

Benteler Glass Processing is synonymous with quality and performance. We provide our customers low risk, industry proven solutions with maximum up time, and processing quality. The foundation of our success is our high concern for quality, investments in new technologies, system planning creativity, and commitment to making continuous improvements. The result is an improved and optimized manufacturing process, giving you a competitive edge in the market.

We offer:

- Customized stand-alone machines
- Interlinked machines and production lines

as well as

- Engineering: project planning and installation
- Advisory skills from planning to start-up
- Individual solutions based on approved modules
- Linkage of hardware and software, also to already existing machines

## Company Background / History

---

The **Benteler Group** with its Business Divisions Automotive, Steel/Tube and Distribution is internationally active. Family run since its foundation in 1876, four generations of Bentelers have directed the Group's growth. It is now one of the largest industrial enterprises in Germany.

Among one of the most important steel tube manufacturers, processors, and distributors in Europe, the Benteler Group is also one of the largest independent automotive suppliers.

Benteler currently employs 28.007 people at 170 locations in 38 countries.
