Web-based rack tracking & recovery (A+WRack Manager) offers integrated order, inventory and logistics software• precise CNC calculation & calibration for drillings (A+W CAD Designer); virtual digitalizing of templates and custom shapes with an ordinary digital camera (Virtual Digitizing)

COMPANY BACKGROUND / HISTORY

A+W, world's leading developer of software for the flat glass producing and processing industry, provide state-of-the-art solutions for the entire spectrum of flat glass production and processing: architectural and automotive, laminated and tempered/toughened, as well as IG. Moreover, **A+W** provides ERP and CIM software for the fenestration industry. **A+W** are a wholly owned company of the **Friedman Operating Group**, Deerfield, IL., USA. In addition to providing innovative, user-orientated solutions for the most varied and complex production configurations, their state-of-the-art ERP systems are the most widely-used branch-specific commercial solutions in the world.

Working hand-in-hand with the world's leading manufacturers of glass production machinery, **A+W** – equipped with in-depth knowledge and first-hand experience of glass manufacture – have fostered through the years the unique synergy responsible for the glass industry's most innovative high-tech breakthroughs.

Founded in Linden, Germany in 1977, **A+W** have been internationally active almost from the beginning. First expanding their activities throughout Europe, they now serve clients throughout the world; in the Near East, Asia, the Pacific, the Americas and the new European states. Around the globe, **A+W** are supported by full-service sales and technical teams working in close proximity to the world's largest flat-glass producers.

The **A+W** software for optimization, administration and production control fulfils all the needs of the world's flat-glass industry, and anticipates the new ones. Including solutions for job and order processing, commercial data capture, ERP systems, production planning and steering for TSG, LSG, IG and processing, the systems monitor and visualize the full range of commercial and production processes. CNC processing machinery guidance, web-based rack tracking & booking, cutting optimization and control, CAD and visual digitizing complete the product palette.
