Year founded 1997

CONTACT PERSONS

Contact 1. Mr. Dr. Miroslav Moravsky
CEO
Mr. Reiner Juffa
General Manager

Contact 2. Phone: 0049 30 56584560
Fax: 0049 30 56584561

PRODUCTS OR MACHINERY

Supported technologies:

- Refining and stirring for removal of bubbles and cords
- Exact dosing for press and blow processes
- Tubing: Vello and DownDraw process
- Rod forming up to 50mm diameter
- Special sheet glass production inclusive LCD glass substrate
- Flexible drains with automatic stop and re-start of glass flow
- Glass beads production from 0,3 mm up to 2,4 mm
- Another special glass production equipment

Advantages of using Platinum systems with electric heating:

- localized heating directly on glass without electrodes
- no contamination of molten glass by dissolved ceramics
- excellent temperature stability & homogeneity

Using our own proven software we design a tailored solution which meets customer needs regarding glass type and its quality, feeding process and pullrate. In our clean room we set up the Platinum system into refractory and steel case to ensure the proper function and long duration of the system. We supervise the installation of Platinum system in the factory and assist our customer until the guaranteed production quality and quantity is reached.

We create manufacturing drawings for platinum parts, steel support and insulation as well as heating and control system

COMPANY BACKGROUND / HISTORY

We provide complex services:

beginning by consulting for planning of new production or improving of the existing one ending with delivery, commissioning and production optimization of our tailored solution to the customers as well as engineering, construction and commissioning of Platinum Systems with electric heating

They are used in glass industry for:

- exact dozing by gobs or streaming
- removing bubbles and cords from molten glass especially for high quality products (optical glasses, LCD glass substrates...)

Advantages:

- localised heating directly on glass
- no contamination of molten glass by dissolved ceramics
- excellent temperature stability & homogeneity
