## PRODUCTS OR MACHINERY

Our plants are located in Austria, Germany, Hungary and the United States where a broad range of refractory products up to 1,800°C is produced. We offer a wide product range from Pre-cast blocks, Dense shaped refractory products to Unshaped refractory products, Insulating firebricks, high temperature insulation wool (which can be formed to mats, punched parts or modules) to vacuum-formed products.

## COMPANY BACKGROUND / HISTORY

The Rath Group with its comprehensive range of refractory products up to 1,800°C is an internationally active company that belongs to the most recognized specialists in the field of refractory technology. Everything started in 1891 with the takeover of a porcelain manufacturer in Krummnußbaum. This was the first step for the formal family enterprise into an international company. Today the company with over 500 employees is active world-wide and quoted at the Vienna Stock Exchange.

Rath combines tradition and innovation in an ideal way. The result is optimal refractory solutions for different glass applications. Our wide product range is coming from our own production. We guarantee high quality through chosen material and precise techniques of processing. As a full-service provider, we not only offer our customers a broad range of refractory materials, but also support them with overall solutions and specific expertise – from the planning stage through to installation.
