PRODUCTS OR MACHINERY

Flat screen printing – a striking printing method

Screen printing is the optimum process when good coverage, precise detail and color intensity are needed to obtain brilliant, high-quality images when decorating hollow glass and printing on containers.

Gallus offers an end-to-end solution for industrial glass / container screen printing – a fully integrated printing system with machine-produced screen printing plates.

The new Gallus Screeny G-Line and C-Line screen printing plates set new standards in cost-efficiency and production reliability when decorating hollow glass and containers with industrial screen printing techniques.

Use the benefits of the Gallus system

- A small number of simple steps in the prepress stage
- Higher productivity due to standardization
- Flexible blockmaking operations
