

Address **AGC Technovation Center**  
Rue Louis Blériot 12  
6041 Charleroi

Country Belgium

## PRODUCTS OR MACHINERY

Magnetron sputtering equipment

### **The horizontal coater**

The horizontal coater is the standard tool for depositing low emissivity and solar control coatings on large area glass substrates up to 3.2 m wide for building sector. High throughput and superior coating uniformity are key to obtain a good color uniformity at the lowest cost of ownership.

### **The vertical coater**

The vertical coater is used for demanding applications with stringent criteria for coating defects like pinholes. This technology is most mature for depositing electrically conductive layers like ITO (indium tin oxide) for the display industry and electrochromic devices.
