Stackers
Handling systems
Conveyor belts and transport systems
Production lines for glass blocks, headlamps, cold light reflectors, glass insulators, ovenware, stemware and tableware
Injection press machines
LASER Crack-off machines
Decorating cutting machines

COMPANY BACKGROUND / HISTORY

WALTEC supplies glass processing companies in over 100 countries of the world. 70 % of the customers operate more than one WALTEC machine or production line in their production. Worldwide, the company is one of the largest glass machine manufacturers, which results in an export business proportion of 85 % of the total turnover.

Together with VITRUMA GmbH & Co. KG, WALTEC is in the position to supply to their customers an oxygen generating plant. These plants generate oxygen at ambient temperature and low operating pressure (6 bar) by the principle of micro-surface absorption from ambient air.
