PRODUCTS OR MACHINERY

The technology that makes difference

Cugher is the perfect partner for all manufacturers of screen printed flat glass. We provide made to order innovative solutions and systems for silk screen printing, the company main fields of application are Automotive, Home Appliances and Architectural.
Cugher was among the first companies in the world to automate the process of screen printing on glass , since then the research, development and innovation are the hallmarks of the way we work.

Our clients are the driving force of our progress . Motivated to deliver solutions that satisfy their needs we push beyond the boundaries of conventional technology to provide order cutting edge solutions.

Product range

Silk screen printing machines, IR – UV Dryers, Accumulators, Handling and transportation, Customized software

Fully automatic machines

Cugher offers two technologically advanced types of printers Series G and Series J
Series G are the best solution for industrial contests that require high automation, big production volumes, quick set up and format changeover and extreme print precision, absolute leader in the Automotive glass printing, available also for double glass printing. Special edition Series G for double glass printing.

Series J are the answer for handling big format, drilled, heavy glass, for medium – high production, the modular machine design provides flexibility, accessibility , easy set up and maintenance, best applications in Architecture and Glass door manufacturing.

Semi-automatic machines

For medium production and special works we offer you Series LS and Canguro
Series LS with max. printing size up to 100x70cm has wide range of applications, it can be personalized for particular types of production. Very easy to use and maintain, occupies small space, high print precision, optionally automatic unloading.
Series Canguro, max. printing size up to 25x60cm, very easy to use, small and compact, completely pneumatic, manual set up and loading/unloading, flexibility of production.

IR and UV Dryers

Cugher dryers comply with the highest industry standards, they can be used both stand alone and integrated in a silk screen printing line. Our dryers are manufactured with the best existing materials and components, in order to guarantee maximum reliability and productivity.

The IR Dryers use medium wave length, mixed type drying technology (IR light and hot air), Kevlar belt transport system under constant tension, automatic power management, which guarantee quick and uniform drying.
The UV Dryers have compact dimensions and guarantee safe operation and complete UV rays protection, Power saving thanks to full digital control system, exit temperature of the glass slightly above the ambient

Complementary equipment

- Edge to Edge systems
- Glass inspection vertical and horizontal systems,
- Automatic screen alignment,
- Stackers and handling equipment,
- Screen integrity control system,
- Rotating tables and corner conveyors,
- Tilting conveyors and bridge conveyors,
- Chiller units for IR Dryers

Turnkey projects

We are specialized in the realization of turnkey silk screen printing lines, providing wide range of optional and complementary equipment and solutions even for the most challenging production needs.
Our clients are testimonials for our reliability and quality, among which, the leading glass manufactures AGC, Guardian, Pilkington, PGW, Saint-Gobain, Schott, Sisecam

COMPANY BACKGROUND / HISTORY

Cugher was among the **first companies in the world to automate the screen printing process on flat glass**. Ever since, the constant innovation, research and development are the distinctive features of our business.

The management decided to invest in technology and resources in order to empower the strive for engineering excellence and innovation which was incorporated in the DNA of Cugher. Entrepreneurship spirit and continuous innovation process quickly led the company to success. Soon after the launch of the first semi-automatic machines for glass screen printing, textile, electronics and household items, new projects for automotive printing machines and fully automated lines were developed.

Cugher quickly became a guarantee for quality worldwide. In 2000 the company was acquired by the Mazza family. The new management implemented new business strategy with focus on the flat glass industry, new resources, investments and a strong emphasis on research and development. Since 2005 the core business of Cugher is the commissioning of complete screen printing lines for the automotive industry. Thanks to its

close cooperation with leading automotive glass fabricators, over the years Cugher has strengthened its ability to anticipate customer's needs. Nowdays it is recognized as one of the most innovative and technologically advanced producers of screen printing solutions in the world.
