## PRODUCTS OR MACHINERY

Schiatti Angelo srl offers a wide range of machines for glass processing, a result of considering the problems presented by glass processors, from the small shop to the big companies.

- Straight edgers to grind and polish pencil, flat with arrisses, Ogee and waterfall edges for glass sheets from 3 to 55mm thick with electronically controlled automation device
- Double edging machines for simultaneous grinding and polishing on both glass edges. They can process the pencil or flat with arrisses edges, with electronically controlled automation devices such setting up and monitoring the working cycle; for glass size from 80 to 4.000mm in lenght and thicknesses from 2 to 20mm
- Complete grinding lines composed of two machines connected by a transfer table are available for processing all four glass sides
- Automatic and semi-automatic drilling machines with opposite heads
- Multi head drillers for the simultaneous execution of 2-3-4 holes
- Straight bevelers for the grinding and polishing of glass as to obtain a bevel from 3° to 45° on thicknesses from 3 to 25mm
- Loaders/unloaders
- Vertical drilling/milling machines
- Drilling centers
- Automatic arrissing machines
