Country	Germany

PRODUCTS OR MACHINERY

Mara® *Tech* MGO (pad & screen)

MaraTech MGO is a onecomponent and at the same time highly resistant ink for glass materials and metals. It can be processed in screen and pad printing.

Advantages

Cost-efficient: One-component baking ink for glass and metal
Economical stocking: Designed for screen and pad printing
Meets highest demands on adhesion, chemical and dishwasher resistance
Suitable for sensitive applications such as baby bottles

Ultra *Glass* UVGL (screen)

Substrates

Coated substrates
Anodised aluminium
Metals
Glass & ceramics

The UV-curable, 2-component UltraGlass UVGL requires no additional post baking while guaranteeing highest resistances. This reduces energy and investment costs and provides efficient production through high production speeds.

Advantages

Efficient production as no oven baking necessary
Enormous energy, time, and space saving
Excellent dishwasher and further resistances
Formulation without critical heavy metals like lead, or cadmium

Mara® Shield UV-CGL (liquid coatings)

UV-curable ink for full-area roller coating onto flat glass.

2-component coating
Very good adhesion to glass
Very high chemical and mechanical resistance
High opacit

Mara® *Glass* MGL (screen)

Substrates

Glass & Ceramics
Anodised aluminium
Coated substrates
Metals

MaraGlass MGL is a solvent-based, two-component screen printing ink for indoor decoration prints onto glass, metal, ceramics, chromeplated, and coated surfaces. If a high chemical or water resistance is required the printed ink film must be tempered for 30 min at 140°C.

Advantages

Highly pigmented opaque shades as well as additional colour pastes for mixing possibilities and opacity as required
High chemical, filler, and dishwasher resistance
Silicone-free and suited for laminating
MGL standard shades are free of aromatic compounds and comply with IKEA Standard MAT-0066

Tampa® *Glass* TPGL (pad)

Substrates

Glass & Ceramics
Metals
Coated substrates
Thermosetting plastics
Anodised aluminium
Chrome-plated parts

Glossy, fast drying 2-component pad printing ink for glass and many other substrates. TampaGlass TPGL impresses with excellent appearance, is easy to use and universally applicable thanks to very good adhesion and high resistances.

Advantages

Outstanding ink flow, easy processing
Very high mechanical, chemical, fill goods, and dishwasher resistance
Highest efficiency thanks to fast printing speeds
Wide substrate range
