PRODUCTS OR MACHINERY

Supplier of Equipment for Waste Water Cleaning, Filtration Companies in the glass and solar industry need high quantities of pure water to wash and process the glass during production. Our pure water recirculation installations guarantee a consistent high water quality during glass washing.

During the production process, the water becomes increasingly contaminated. It is then purified by a multi-stage unit and re-fed into the process water system. This increases your system´s reliability and optimises your expenses.

Applications: cooling; silk screen printing; production of insulating glass, tempered safety glass and laminated safety glass; coating technology; mirror coating; car glass production.
