PRODUCTS OR MACHINERY

The versatility of the Scandiuizzi Group stands out in the supply of plants for the preparation and mixing of vetrifiable products, in the complete production and installation of supporting frameworks, silos, transport systems, mixing and electroinstrumental systems as well as plants devoted to the selection and working of scraps. Scandiuizzi also defined a profitable technology for the production of metal structures that can be reused for smelting furnaces. Furthermore, to ensure a safe and more complete service aimed at saving money, we offer the installation of refractory materials, the application of effective regeneration systems, the construction and installation of smokestacks of the most different typologies and the production of machines for conveying materials such as elevator belts.
