PRODUCTS OR MACHINERY

Glass polishing machine - fiber optic rotary joints, pigtailed diode lasers, passive fiber optic components, and fiber polishers

COMPANY BACKGROUND / HISTORY

Princetel, Inc. is a privately funded manufacturer of optical inter-connection products. Our four main product lines are fiber optic rotary joints, electrical slip rings, fiber optic components, and fiber/glass polishers and polishing machines.

The unique portable polisher with a hand crank is ideal for field applications, especially where electrical spark is prohibited. The same machine can also be equipped with an 12 V motor for lab or production environments.

Our portable polishing machine and the fully automated machine share the same polishing fixture elements. So they are interchangeable and easily modified to fit a variety of polishing needs.

Company Profile of **Princetel, Inc.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
