PRODUCTS OR MACHINERY

We produce glass containers using the "Narrow Neck Press and Blow" method, which achieves a lightweight container. New equipment with automatic control of the process, is installed on the glass-forming machines. It includes a modern system of radial and axial cooling of the moulds on the roughing and finishing side, which allows the glass to be distributed evenly in the product and eliminates many types of defects in production.

Manufacturer of glass bottles, beer bottles in brown and amber colour

Company Profile of **Alex Trade**
