## PRODUCTS OR MACHINERY

Our main products are MoSi<sub>2</sub> and SiC heating elements , MoSi<sub>2</sub> heating element is a kind of resistance heating element basically made of high pure Molybdenum Disilicide. It can be widely used in such applications as sintering and heat treatment on ceramics, magnet, glass, metallurgy, refractory, etc. We can offer different types of products. The silicon carbide heating element is a kind of non-metal high temperature electric heating element. It is made of selected super quality green silicon carbide as main material, this kind of element is characterized by high-applied temperature, anti-oxidization, anti-corrosion, long service life, little deformation, easy installation and maintenance.

### Company Profile of **Zhengzhou Chida Furnace Material Co.,Ltd**

A service of glasssglobal.com, an affiliate of glasssglobal group.
