Address	DayStar Technologies 1010 S. Milpitas Blvd. Milpitas, CA 95035
Country	USA
State	California

PRODUCTS OR MACHINERY

DayStar is developing a new photovoltaic module based on our proprietary one-step CIGS deposition process. The product will address a readily available market as it is designed to be compatible with solar system designs being installed today in the largest and most rapidly growing thin film markets.

The product specifications for DayStar's new CIGS modules on a glass substrate have been developed in close cooperation with our customer and development partners to be consistent with their application requirements. Our plan is to produce monolithically integrated CIGS modules on 1.2 m by 0.6 m glass laminate substrates. The modules are designed for high voltage grid-connected utility and commercial market applications meeting rigorous industry standards.

Company Profile of **DayStar Technologies**

A service of glasssglobal.com, an affiliate of glasssglobal group.
