PRODUCTS OR MACHINERY

NaREC encompasses a range of research, testing and development facilities across the spectrum of energy industries. A specialised team of technical and engineering consultants with a wide range of practical experience work to support the development and testing facilities at NaREC, helping to bridge the gap between innovation and realisation. NaREC's unique world-class facilities offer testing and development of large wind turbine blades, marine renewables, offshore and subsea equipment, micro-renewables and High Voltage electrical equipment. NaREC also has facilities and consultancy expertise for the development and integration of large and small-scale renewables into the energy mix including assistance with small scale embedded generation and power systems analysis.

Company Profile of **NaREC**
