Address	GUASCOR FOTON POLIGONO INDUSTRIAL GRANADA, PARCELA 1 48530 ORTUELLA (VIZKAYA)
Country	Spain

PRODUCTS OR MACHINERY

GUASCOR has new technology for gasifying different types of biomass: Rice husks, olive cake from olive residues, wood chips, etc., with industrial plants already in operation.

The gasification plants are based on a modular concept, being able to process between 8,000 and 60,000 tonnes of biomass per year. The gas obtained from the gasification plants is used as a fuel for the GUASCOR gensets, which convert it into electrical energy that can be exported to the national grid.

The high performance of the GUASCOR built biomass gasification plants, and the later production of electricity with the gensets, represents a competitive solution when compared with conventional boiler-fired systems.

Company Profile of **GUASCOR FOTON**
