Smoke Control

Often it is not fire that kills - it's smoke. Smoke prevents the fire brigade from seeing where the source of the fire is, and prevents people from escaping. Over many years Colt has been involved with research about the behaviour of smoke from fires. Colt's smoke control systems ensure that if there is a fire, smoke is contained and removed, allowing safe egress and minimising damage.

Architectural Solutions

Architecture has to resolve the often-conflicting demands of form and functionality. Architects wish to create buildings that are impressive and unmistakable, but also that actually function. Colt offers intelligent and attractive solutions to the specifier:

Coltlite glazed ventilators
Solar shading systems
Screening and performance louvre
Glass constructions
Climate Control

Research shows that uncomfortably high or low temperatures, solar glare, lack of fresh air movement, high humidity or lack of natural daylight lead to lowered productivity, higher absenteeism and a greater risk of accidents happening within the working environment. Colt carries out detailed site surveys, and based on many years of experience in this field provides its clients with creative and effective solutions.

Colt also offers the Caloris WRF (Water and Refrigerant Flow) system, which is a revolutionary approach to air conditioning. Please click [here](#) for more details.
