## PRODUCTS OR MACHINERY

EPLY Series of Photovoltaic Modules

Our EPLY Series of PV modules are designed and constructed to last. Some of the features of our solar cells and modules include:

Premium mono-crystalline cells that offer efficiencies of over 16%

Corrosion resistant frames constructed to withstand high wind speeds and the harsh environmental conditions

Anti-reflective coating reduces loss of energy from the sun's rays reflecting off the module and allows more energy to enter, thereby increasing the module's conversion efficiency

Tempered low-iron high-transmittance glass for better impact resistance and less energy loss from light passing through the module's glass surface

EVA Encapsulation enhances solar cell performance and weathering protection

Company Profile of **Eoply New Energy Technology Co., Ltd.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
