PRODUCTS OR MACHINERY

The solar street lamp SOX is a system powered by solar energy. The energy stored during the day is used during the night. The street lamp automatically "switches on" at sunset and illuminates from a minimum of 9 hours to a maximum of 14 hours per night. The energy stored in batteries, which are buried underground, guarantees proper functioning even during prolonged bad weather. The solar street lamp SOX is the right answer for supplying night lighting in parking lots, service stations, intersections, where normal electrical lines are not available.

Company Profile of **Gechelin Group Srl**

A service of glasssglobal.com, an affiliate of glasssglobal group.
