Address	<b>Jiangyin Jietion Science and Technology Co., Ltd.</b> No. 1011, Zhencheng Road Shengang Jiangyin Municipality Jiangsu Province
---------	--

---

Country	China (People's Republic)
---------	---------------------------

## PRODUCTS OR MACHINERY

Growth in renewable energy is being driven by a variety of factors. One of the most important is the need to protect the environment by reducing the level of greenhouse gas emissions in light of widespread acceptance of the role of greenhouse gas in causing global warming. The need for security and diversity of energy supply are also important factors and in particular, a desire to reduce energy reliance on politically unstable regions of the world. In addition, rising energy prices and improvements in renewable energy technology and efficiency are enabling renewable energy to become increasingly competitive with non-renewable sources. As opposed to fossil fuels, which draw on finite resources that may eventually become too expensive to retrieve, renewable energy sources are generally unlimited in availability.

### Company Profile of **Jiangyin Jietion Science and Technology Co., Ltd.**
