PRODUCTS OR MACHINERY

Increased demands for superior quality and distortion-free tempered glass are readily met at Garibaldi Glass with the latest generation H.H.H. architectural convection-tempering furnace.

As a generalization, tempered (toughened) glass is three to five times stronger than non-tempered glass of the same thickness. This ability makes tempered glass the number one choice in safety situations.

With our oversized loading beds, we are capable of tempering 1/8" (3mm) to 3/4" (19mm) thickness and a capacity up to 84" x 210".

To maximize our temper furnace's potential, we have installed a 204" x 130" CNC automated cutting table and stock packs of 204" x 130" as standard stock

Company Profile of **Garibaldi Glass Industries Inc.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
