PRODUCTS OR MACHINERY

ECD Ovonics' technology enables commercial solutions for applications in the information field for processing, storing, and delivering information. Our technology is being applied to make devices and products, including optical disks, FLASH and DRAM memory replacements, powerful new cognitive processors, optical routers, and photonic components.

Our base technology originates from Stanford R. Ovshinsky's pioneering inventions in amorphous semiconductors and phase change materials. Our materials and devices have inherent characteristics that allow continued generations of semiconductor devices, surpassing the traditional silicon-based devices which are approaching fundamental physical limits.
