PRODUCTS OR MACHINERY

Solibro GmbH is a joint venture of Q-Cells AG and Swedish Solibro AB. The company will start its production at Solar Valley (Bitterfeld-Wolfen) from midyear 2008. The goal is to commercialise a Copper-Indium-Gallium-Diselenid (CIGS) technology originally developed and later transferred from Swedish Solibro AB. CIGS solar modules stand out due to their relatively high efficiency level and attractive appearance.

The previous pilot line in Uppsala/Sweden has already been transferred into a development centre as a 100% subsidiary of Solibro GmbH. The centre supports the production in terms of technology and pushes strategically important enhancements of CIGS thin-film technology. Q-Cells AG has a 67.5% share in Solibro GmbH.
