Address	QSIL GmbH Gewerbering 8 98704 Langewiesen
Country	Germany

PRODUCTS OR MACHINERY

The range of products extends from fused quartz hollow cylinders, tubes, staves and profiles to process reactors with large diameters and products processed via glass-blowing.

ilmasil® - fused quartz is produced by our in-house developed plasma fusion method. In a rotating furnace mold high purity quartz crystalline material is melted to fused quartz glass cylinders (billets) using a high power plasma arc.

This environment friendly fusion method promotes a high degree of flexibility in geometry as well as material properties.

- Cylinders
- Clear Tubing
- Profiles / Rods
- Translucent Tubing
- Capillaries
- Laboratory Ware
- Flat-, Oval-, Twin Tubing
- Special Appliances
- Process Tubing
